

Mykola Kosmachevskyi

.NET Developer

Sweden | +380 63 737 6245 | kkosmacevskij@gmail.com | GitHub: <https://github.com/>

SUMMARY

.NET Developer with 3+ years of experience building commercial web applications, backend APIs, and integrations. Strong focus on ASP.NET Core, PostgreSQL, Entity Framework Core, JWT authentication, email flows, Cloudinary, REST API design, and GDPR-aware personal data handling. Comfortable taking business requirements from idea to maintainable implementation with clean code, practical architecture, and reliable delivery.

TECHNICAL SKILLS

Backend: .NET 6-10, .NET 10 LTS, .NET 9, .NET 8 LTS, .NET 7, .NET 6 LTS, C#, ASP.NET Core, ASP.NET MVC, Web API, RESTful API design, EF Core 6-10, LINQ, dependency injection, clean architecture basics

Databases: PostgreSQL, Microsoft SQL Server, SQL, query optimization, migrations, indexes, relational database design

Frontend: React, TypeScript, JavaScript, Vite, HTML5, CSS3, Tailwind CSS, Bootstrap, responsive layout, API integration

Security & compliance: JWT auth, refresh tokens, HTTP-only cookies, role-based access control, GDPR basics, personal data handling, privacy-aware API design, data validation

Tools: Git, GitHub, Visual Studio, VS Code, Postman, Swagger/OpenAPI, Docker basics, npm, Chrome DevTools

EXPERIENCE

.NET Backend Developer - Commercial Project

AutoAlexDE.Api | 2026 - Present

- Developed and maintained a production-ready ASP.NET Core backend for an automotive business with a car catalog, customer requests, users, and admin operations.
- Configured PostgreSQL with Entity Framework Core migrations and domain models for Cars, CarRequests, Users, EmailConfirmationTokens, and PasswordResetTokens.
- Implemented JWT authentication with refresh tokens in HTTP-only cookies, Google login, email confirmation, password reset, and role-based authorization for admin features.
- Integrated Cloudinary image upload/delete for car photos, production CORS configuration, multilingual car descriptions, and GDPR-aware account deletion flows.
- Reduced public data exposure by masking VIN values for anonymous users and keeping sensitive authentication data in secure cookies.

.NET Developer

Nordic Code Solutions | June 2023 - July 2026

- Worked on commercial web applications for small and medium-sized businesses, building backend solutions with .NET 6-10 / ASP.NET Core and database integrations.
- Designed REST APIs, DTO models, service-layer logic, validation workflows, Swagger documentation, and maintainable business logic.
- Optimized SQL queries and worked with Entity Framework Core, SQL Server, and PostgreSQL to improve data access reliability and performance.
- Implemented authentication, GDPR-aware personal data handling, and responsive UI parts with Bootstrap/React.
- Participated in code reviews, debugging, refactoring legacy modules, and migrating systems toward modern .NET architecture.

Cyber Police Experience

Cyber Police of Ukraine | 2022

- Worked in cybercrime counteraction at the beginning of the war against the Russian aggressor, supporting efforts to identify and disrupt criminal digital activity.
 - Analyzed digital data, OSINT materials, logs, and technical indicators to help detect suspicious behavior and document relevant digital traces.
 - Supported authorized data interception and analysis tasks in an investigative context, with attention to operational discipline and lawful handling of sensitive information.
 - Gained practical experience in ethical hacking, security testing, threat analysis, and cooperation around cybercrime prevention.
-

COMMERCIAL & PERSONAL PROJECTS

AutoAlexDE.Api

Commercial backend API

Backend API for an automotive business with authentication, car catalog management, customer requests, admin operations, image handling, multilingual content, and GDPR-aware personal data flows.

Stack: ASP.NET Core, C#, PostgreSQL, EF Core, JWT, Google Auth, Cloudinary, MailKit, GDPR

Task Management Web App

Personal full-stack project

Task management application where users can create, update, and delete tasks with a responsive Bootstrap interface and PostgreSQL-backed data storage.

Stack: ASP.NET Core, PostgreSQL, Bootstrap, Git

EDUCATION

B.S. Computer Science

Odesa National Polytechnic University, Odesa, Ukraine | 2022 - 2026

Completed Computer Science studies with focus on Software Engineering, Calculus & Geometry, Algorithms & Data Structures, Architectural Patterns, Databases, Web Development, and DevOps.

LANGUAGES

Ukrainian - native | English - CEFR B1-B2 | Swedish - beginner

SOFT SKILLS

Problem-solving, communication, adaptability, teamwork, time management, attention to detail, ownership of technical tasks, and clear explanation of engineering decisions.
